

CHANDRA KIRAN TEJA

DonauSchwabenStr. 18, Passau, Germany, 94036 | +49 15217419247 | chandrakiranteja@gmail.com | [Linkedin](#)

M.Sc. AI student with hands-on experience in computer vision and deep learning, focusing on model development, optimization, and deployment. Supported by IEEE publications and industry internship experience in real-world ML applications.

EDUCATION

M.Sc. Artificial Intelligence Engineering | Universität Passau, Germany | Oct 2024–Present

- Coursework: Generative AI, Deep Learning, Responsible ML, AI Engineering

Bachelor of Technology in Artificial Intelligence | SRM University, India | Aug 2020–May 2024

- CGPA: 9.4/10 (Equivalent to 1.3)
- Thesis: *Action Recognition for Intelligent Surveillance System using Transformers*
- Coursework: Data Structures, Machine Learning, Neural Networks, Probability, Optimization

EXPERIENCE

Deep Learning Engineer Intern | Resolute AI Software Pvt. Ltd., Bangalore, India | Nov 2022–Feb 2023

- Developed multiple ML PoC pipelines in Computer Vision and NLP using Python and TensorFlow
- Built YOLOv5 models achieving >90% detection accuracy on real-world datasets
- Collaborated on model deployment for prototype applications
- Communicated model performance using evaluation metrics (precision, recall)

RESEARCH PUBLICATIONS

[DenseNet-Transformer Model, A Hybrid Architecture for Improved Human Action Recognition in Videos](#) | IEEE ICAECT 2025

Introduced a hybrid deep learning architecture combining DenseNet with Transformer blocks to enhance video-based human action recognition.

[Action Recognition for Intelligent Surveillance System using LRCN with Attention Mechanisms](#) | IEEE ICAECT 2024

Developed an LRCN-based approach augmented with attention mechanisms for accurate action classification in surveillance footage.

[Enhancing Real-Time Human Tracking using YOLO-NAS and DeepSORT Fusion Models](#) | IEEE ICAECT 2023

Designed a robust human tracking pipeline by fusing YOLO-NAS detection with DeepSORT for multi-object tracking in real-time environments.

SKILLS

Programming: Python, C, C++, SQL

ML/DL: PyTorch, TensorFlow, scikit-learn

Computer Vision: OpenCV, YOLO, DeepSORT

Tools: Git, MATLAB, Jupyter, Google Colab

Platforms: Nvidia Jetson Nano

PROJECTS & RESEARCH

End-to-End AI Pipeline for Image Analysis (AI Engineering Lab Project, Master's)

Developed a full-stack AI system for segmentation, detection, and classification using SAM, YOLO, and ViT; implemented zero-shot and few-shot learning with score fusion, and optimized performance for low-memory environments with Prometheus and Grafana monitoring.

DenseNet-Transformer Model for Human Action Recognition (Bachelor's Thesis)

Designed a hybrid model combining DenseNet and Transformer features to detect human actions in video; achieved 5–7% improvement in classification accuracy.

Animal Intrusion Detection and Classification System

Developed and deployed YOLOv5 on Nvidia Jetson Nano for real-time wildlife detection using a custom dataset (15+ classes), achieving 90% accuracy.

Real-Time Human Tracking with YOLO-NAS and DeepSORT

Engineered a real-time object tracking pipeline by integrating YOLO-NAS for detection with DeepSORT for multi-object tracking.

Action Recognition for Intelligent Surveillance using LRCN with Attention Mechanisms

Built LRCN-based model with attention to classify human actions in surveillance footage; ~87% accuracy. Developed as a 7th-semester minor project in bachelors and presented at an IEEE conference.

CERTIFICATIONS

AI-ML Virtual Internship | Google for Developers – India Edu Program | Jan 2024–Mar 2024

AI-ML Virtual Internship | AWS Academy | May 2023–Jul 2023
